HOW DOES IT WORK

## Offshore wind energy - Dolwin 3

Connecting offshore wind energy to the grid

 HVDC    POWER CONVERSION    SUPERGRID  
 WIND

*In February 2013, Alstom in Stafford, won an order worth around £125m as part of a wider company contract to supply a grid connection to the DolWin offshore wind farm in the North Sea.*

*The DolWin3 project, owned by TenneT, will utilise high voltage direct current (HVDC) technology, designed and built in Stafford, Alstom's global centre of excellence for HVDC.*
